Whatsapp plus mod apk for iphone

WhatsApp is one of the best social messaging apps out there for iOS. You can instantly share photos, videos, audio and documents with your contacts. The app lets you stay in touch with your friends and families through voice and video chat. While WhatsApp has added a lot of new features in the last several years, there are still some essential features that are missing from the app. To fill this gap, WhatsApp++ is the ultimate tweak that brings a lot of exciting new features to WhatsApp to make it more useful and easy to use. Features of WhatsApp++ Here's a list of some features that WhatsApp++ offers: Tap once to start recording audio instead of holding on to it Password protects WhatsApp share documents of up to 100MB from others you've seen online and finally so that others know how to customize the app when messages have been optimized Use the customization options available Block receipt video ads for contacts and promote ads Hide upload button How to use default main page WhatsApp++Send more than 10 media at once? All the features given by this tweak are made in WhatsApp. You can access them by visiting WhatsApp's settings page and you will get the option to access WhatsApp++ settings. From here, you can enable or disable every feature provided by this tweak. How to download and install WhatsApp+++ ? 1. Install WhatsApp++ on non-Jailbroken device If your device is not in jail, you can still install and use WhatsApp++. To do this, you need to use a sideloading tool. In this tutorial, we'll show you how to sideload WhatsApp++ with a software called AltStore. Before you start, make sure you remove the original WhatsApp from your iPhone. First, download and install AltStore on your computer and device. For instructions, read our full guide here. Go to this page on your iPhone or iPad and download WhatsApp++ IPA on your device. You can download the IPA by clicking on the Green Download IPA button on the page. Once downloaded, open AltStore on your device. From the tab at the bottom of the app, tap on the My Apps tab. Now press the + icon in the top left corner to add a new app. You'll see a list of all IPA files downloaded with Safari. Tap WhatsApp++ IPA that you downloaded earlier. AltStore will start installing the application and it takes a few minutes for the process to finish. Once installed, it will appear on the My Apps page and you can open it from there or from the home screen. If you get an error stating that the AltStore server can't be found, you can connect your device to your computer using just a cable and then install WhatsApp++. Now WhatsApp++ should be installed on your device. Go to the home screen and launch WhatsApp, then access the options provided by WhatsApp++ Go to the Settings page. 2. Install If you jailed your device on a Jailbroken device, the process of installing WhatsApp++ is quite simple and straightforward. On your device, open Cydia and go to the Source tab. Tap the Edit button, then add. Enter the following source: Once the new source has been successfully added , go to the Search tab, search for and install WhatsApp++. The Cydia source for WhatsApp++ Cydia Repo WhatsApp++ is as follows: you can add this repo by going to the Siddia &t; Source tab, then press the Edit button and choose the add. How to download WhatsApp++ IPA? To download WhatsApp++, click on the green download ipa button at the top of this page. All apps on our website are kept up-to-date in the latest version released by developers so you can make sure you'll always get the latest stable release. WhatsApp has now become the most popular app for communication. Its popularity has passed more than a billion people. In other words, more than a billion individuals are now connected to a forum. Recently, our users have requested us to write about WhatsApp Plus iOS. That is why we are presenting this piece. In this article we will tell you about the app info, features and method to install WhatsApp Plus on your iPhone. Therefore, you should keep reading for more. WhatsApp Plus for iOS This is an application that is specially designed to run on apple systems. The details of the application are as follows. Features of WhatsApp Plus are similar to the Android app. But there are also unique features which need to be mentioned. Let's dive in detail. You can hide your online status from others. You can hide your last seen status from others. You can disable the read receipt. Using this feature, you can get more privacy by not telling others that you have read the message. You can disable delivery receipts. This feature gives you more power in your privacy settings. People will only know in detail when you wanted to know them. You can customize the look and feel of the WhatsApp app. This means you are in charge of the presence of the app. You can use a full profile picture, which will not be cropped. You can send more than 10 media files at once. You are allowed to share music from your device. You can record audio with a single tap. Other than tapping and grip operation. You can lock WhatsApp with Touch ID or passcode. You can share files up to 100 MB size. How to install WhatsApp Plus with Siddia Impacter? The process is straightforward; You need to follow the steps. For this you should download the WhatsApp plus IPA file on your computer. You can use this link here. Now you have to download the Siddia impacter from here. Now your device has to connect to the computer using a USB cable. Open Sidia Impacter. Now, you need to drag and drop the IPA file to the Sidea Compactor. Sidia's Impacter You Get Apple ID And Password If you're not comfortable with it, use one Apple ID. When the app is installed, go to Settings, then choose General, after that, you need to select the profile. Now you have to find and open the profile from your Apple ID. After that, you need to tap on the Trust button. Now you can enjoy the app download WhatsApp Plus Yes, whatsapp plus for iPhone. To be able to use the iPhone version, depending on whether your device has to run the jailbreak: without rushing, you can download the IPA file that we are giving you a few lines below and install it using the choice tool of the Siddia Impacter, which we are also giving you. With Jailbreak, it's installed via Sidea, the ultimate repository of iPhone and iPad applications that aren't available in the official store. If that's your case, you just have to travel to Siddia and search for it there. We have to point out that this WhatsApp Plus has not been developed by the same creators as the Android version. In fact, it's not even known as the same name, as it's officially called WhatsApp++ or WA++. On iOS, WhatsApp Mods aren't as popular and therefore, not as many available. Like Android, this WhatsApp+ version for iPhone offers us various advantages such as hiding double blue checks for reading messages or hiding our latest online time for our contacts. For all the latter we also need to add a lot of customization options to its interface or the option to send more and more large files at once. If you choose to use such a tool, you should bear in mind that you will no longer use the official app and will not receive regular updates. Also keep in mind that every now and then, WhatsApp blocks the use of such an app: you may be forced to uninstall your mod and install the official version if you want to continue chatting with your contacts. However, don't forget that both the official version and this mod can stay together on your phone screen without any hassle. WhatsApp Messenger, the most popular instant messaging and chat application in the world with over a billion users, still has some drawbacks. We're talking about the functions that are lacking from the original version, and that's why some apps of APK's choice of WhatsApp Plus have become so famous in terms of Android. So far, iPhone users couldn't make the most of these optional WhatsApp as we mentioned above, but now we can download WhatsApp++ with which we can add new functions and configurations to the chat app, improve its performance and features. New tasks with WhatsApp Plus Plus and so you can get acquainted with WhatsApp++, we'll tell you what it's capable of: Hide blue double check that indicates you've read messages. Hide your online and last seen status. Customize the interface. Add a large profile picture without editing it. Send an unlimited number of multimedia files. Without microphone button Record audio by To suppress it while you speak. Block the application with Touch ID or with lock code. Share music from the device. The good thing about this application is that you can install it without the need to jailbreak your iPhone. The bad thing is that, like Android, you will be forced to uninstall the official WhatsApp Messenger. Therefore, it is recommended to back up all your important messages before doing so. How to install WhatsApp++? All you have to do is follow these steps: Step 1: Uninstall WhatsApp Messenger from your iPhone. Step 2: Download the IPA file to your computer. Step3: Get hold of Cydia Impactor and connect your iPhone to your PC. There are versions for Windows, MacOS, and Linux. Step 4: Open the app with this program and present your Apple ID and password to verify the app. This software will install the application on your device. Step 5: Go to Settings - General - This developer on profile and trust presses on the new WhatsApp profile. Once you've completed all these steps, you can launch the app and just chat with the new tasks you've always done, but provided by this version of WA++. What's new in the latest version? Adds the latest features of the original WhatsApp. WhatsApp.
