Icarsoft por ii software

The iCarsoft POR II Porsche OBD-II scanner is an OBD-II system designed for Porsche. In addition to informing about possible problems with the car, the tool could remove some annoying features. If you are looking for an in-depth review of iCarsoft Por II, this is the right place, but first, let's take a look at the chart below to see how it competes with some other iCarsoft scanners for Porsche. iCarSoft POR II vs. iCarSoft POR V2.0 vs. iCarSoft POR V1.0 iCarsoft POR-II Overview OBD-II system is one that was adopted relatively early in the automotive industry. This system monitors the vehicle's electronics. The system is designed to help the car carry out self-monitoring and report findings. OBD-II systems basically tell the driver where the problem is. Then it becomes the responsibility of the driver to solve the problem. In general, OBD II systems save the driver the cost of checking in the garage. The iCarsoft POR II Porsche OBD-II scanner is an OBD-II system designed for Porsche. In addition to informing about possible problems with the car, the tool could remove some annoying features. Most people would love to get rid of some warning lights and beeps. In such cases, the iCarsoft POR II Porsche Scanner comes in a good way. iCarsoft POR II Detailed Overview Compatibility iCarsoft POR II Porsche OBD-II is specially designed to read from Porsche. It can diagnose and report any errors, as well as help the driver get rid of error codes. iCarsoft POR II Porsche is designed to work in any Porsche model. These models range from sporty SUVs like the Cayenne and Macan to sports cars like the 911. The diagnostic tool works on all models. This scanner is only available in the vehicle. The tool does not come with an app for your mobile phone. View Most users report that they are satisfied with the display of the iCarsoft POR II Porsche scanner. The device has a display that contains all the features that the user requires. Additionally, the features are displayed on the color OLED screen. The screen is also bright enough to be seen in brighter parts of the day. One of the errors of the display is that it is quite small. The screen is 4 large, which could be a little harder to code for people with bigger fingers. Porsche's iCarsoft POR II software comes standard with software developed by iCarsoft Technology Inc. The software is specially designed to be user friendly and unique at the same time. By default, instructions on how to use the software are in the manual. Most users said that it is quite easy to maneuver through software functions even without manual. Features of iCarsoft POR II Porsche was made as a diagnostic scanner for Porsche. It analyzes possible problems and flicks warning lights to alert the owner. However, the system performs more functions than these, some of which include: Able to read all types of from transmission codes to airbag codes. (It can also clear this code). Capable of working with ecu vehicle and ABS. It can read the bitum coming from the car. The system is equipped with Metal Dome Keys, which are very easy to use. Help the user calibrate the warning lights according to the service plan. The scanner has the ability to make a full diagnosis of ABS and airbags and erase all error codes, if anyCourt is that it allows the user to turn off the warning lights and sounds. Some include beep seat belts and brake warning lights. A short video about iCarsoft POR II for porches scanner functionality iCarsoft POR II Porsche is made to perform the following key tasks. Scan and clear any potential problem codes from the dashboard. Monitor all electrical functions of the vehicle, which include ABS, airbags, seat belts and engine condition among many others. The scanner can re-calibrate the warning and service indicators. Unique user-friendly software Can turn off unnecessary warning lights. It will help you prepare for potential problems Most users think that the effective screen is quite small. A mobile application for remote access to the diagnosis of the vehicle is missing. Work only with Porsche Who's built for? The system is specially designed for Porsche owners. Works well with almost all Porsche vehicles. In addition, the obd-II vehicle must be authorised.
