## Window regulator guide clip

Each editorial product is independently selected, although we may be compensated or receive affiliate commissions if you buy something through our links. Despite AmazonCable-operated window controllers break quite often on late-model vehicles. They are quite easy to replace. (For step-by-step instructions, see repair a power window.) But before you click into the repair, check the condition of the door glass seals. If the buckles are cracked, they must be replaced, otherwise they will break completely and likely damage the new regulator. Buy new clips from the car parts store. Clips for attaching glass are stuck in place in the factory. So you're going to have to gently carved them. Then use two-piece glass epoxy (3M No 08641 Channel Bond Adhesive; \$25 at amazon.com) to glue new clips in place. Allow epoxy to set for several hours before reasseming the window. Buy Channel Bond glue now on Amazon.
